

evo | The Wiring Solution for Offsite & Podular Construction

Fully Engineered Cabling Solution

With the gradual decline in the affordability of qualified onsite labour and encouragement from the Government into “modern construction methods”, new products and improved installation techniques are becoming increasingly important to the construction industry. This has led to an increase in the use of offsite construction techniques, including fully assembled bathrooms, kitchens and bedrooms delivered to site ready to occupy.

Apex Wiring Solutions have developed, in conjunction with a number of strategic partners, a fully **Pluggable Offsite and Residential Solution** that compliments their already established electrical installation packages offered to commercial and healthcare sectors.

With a small number of repeatable electrical components, all fully tested, the proven performance and associated project benefits can be directly applied to the offsite manufacturing process, optimising labour usage, increasing throughput and reducing bottlenecks - with a demonstrated productivity increase of upto 400%.

Electrical installations have eVolved...

Flexibility pays off...

In Brief

- A **32 Amp Solution** providing the highest rated connector of it's type in the market place.
- **Factory tested assemblies** reduce testing in the construction process
- Eradicate cabling errors using quick **pluggable, coded & lockable connections**.
- Peace of mind from **Quality Assured** products and services.
- **Environmentally friendly** ordering only what is required for the project, with **zero waste**
- **Rapid installation** allowing accessories to be fitted, fully working in one visit
- Flexible supply with individual pod / project **kitting**
- With no onsite cable preparation a **safe, risk free installation** is achieved by reducing the need for blades and cutters.
- Numerous **cost benefits** including reduced onsite labour and improved programme.
- All connections are **fully accessible** without the provision of inspection hatches

Offering a fully engineered packaged solution including project management, system design using the latest technology and CAD tools, through to kitting and 'just in time' shipping Apex Wiring Solutions are confident that the customer's requirements are delivered on time and right first time.

*“.. quality, service
and cost ..”*

Accessory Range

Fast fix "Swinglock" technology
 Eliminates wall noggins
 Factory assembled & tested
 Suitable for any depth of wall cavity
 Available with all standard wiring accessories
 Available in White or Chrome as standard
 Other finishes on request
 Colour coded to aid installation
 Mechanically coded to stop mis-mating

Slave Pendant

Fast fix "Swinglock" technology
 Eliminates ceiling noggins
 Factory assembled & tested
 Suitable for any ceiling depth
 3 and 4 wire configurations
 Colour coded to aid installation
 Mechanically coded to stop mis-mating

Switch Unit

Factory moulded assembly
 Suitable for 1 Way, 2 Way & Intermediate Switching
 Easy to access through luminaire cut out
 3 and 4 wire configurations
 Colour coded to aid installation
 Mechanically coded to stop mis-mating

Consumer Unit

Factory assembled & 100% tested
 Manufactured to customer specification
 Fully pluggable outgoing ways
 Concealed external fixing
 Vanity panel to cover connections

Extender Lead

19mm maximum diameter
 Available in 1.5mm², 2.5mm² and 4mm² cable
 Factory assembled & tested
 3 and 4 wire configurations
 Colour coded to aid installation
 Available in standard 1m length increments
 In PVC or Low smoke zero halogen as standard

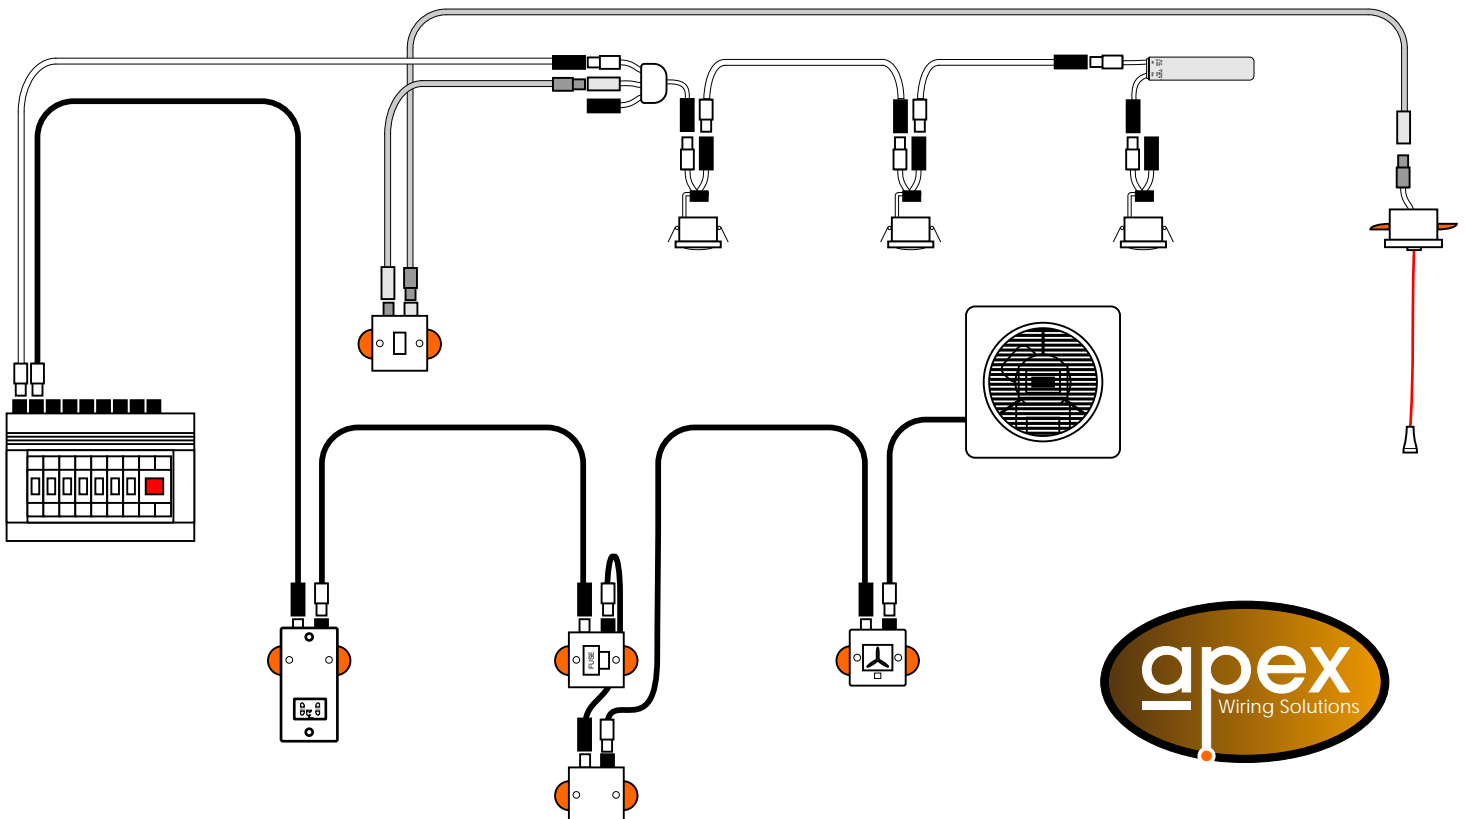

Branch Connector

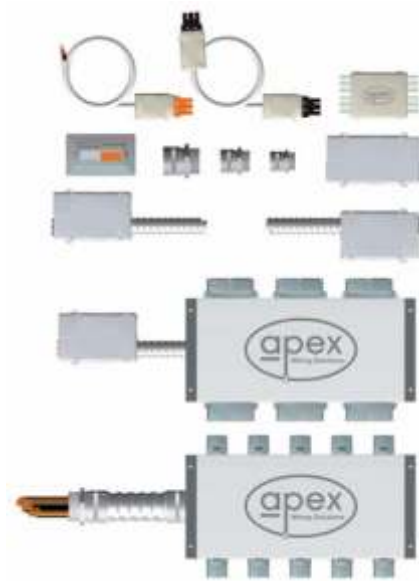

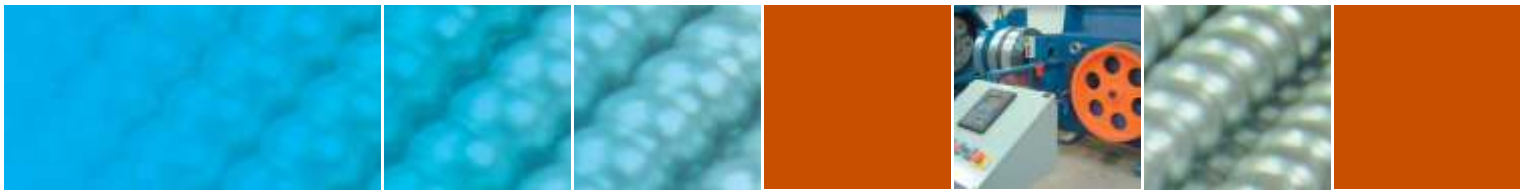

Factory moulded unit
 Allows splitting of circuit
 3 and 4 Wire Configurations
 Colour coded to aid installation
 Mechanically coded to stop mis-mating

Pre-wired Luminaires

Factory assembled & tested
 Shipped ex-stock for standard range
 Downlighters available in White, Chrome, IP44, IP65, Low voltage or 240V
 Colour coded to aid installation
 Mechanically coded to stop mis-mating
